Main Problems Encountered

Problem 1: We missed the deadline to merge dev into main.

Description:
All our merge requests were finished on Tuesday as planned. However, due to the fact that people did not start reviewing other MRs on time we could not complete all MRs before the merge deadline on wednesday 3PM.

Reaction:
This wasn't a big issue this week as not much was scheduled due to the upcoming vacation. Considering that and the fact the team needed some time off from the project we decided missing this deadline was not a big issue.

Action points
- Enjoy your vacations
- But be ready to still work after christmas, we aren't there yet!
